Art Unit: 1644

1. Claims 36, 38-40, 42 and 44-45 are pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5-17-04 has been entered.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 40, 42, 44, 45, 46 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Sunthornthepvrakul et al., (U) or Clifton-Bligh et al., (V), all of record for reasons set forth in the Paper mailed 4-28-03.

Applicant's arguments and declaration filed 5-17-04 have been fully considered but are not found persuasive.

The instantly rejected claims are drawn to cDNA or mRNA molecules and not stably transfected cells. Since Applicant's declaration filed 5-17-04 clearly states that stable transfection can occur via a two plasmid system, one with the gene of interest and the other with antibiotic selection, the plasmids taught by the prior art are usable in a stable transfection system as one part of a two plasmid stable transfection system.

4. Applicant is notified claims 36, 38 and 39 are currently free of the prior art.
5. The fax number for the organization where this application or proceeding is assigned is 703-872-9306.
6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished
